PROFESSIONAL SUMMARY

Results-driven developer with a strong foundation in backend engineering and machine learning. Adept at building robust web services, developing predictive models, and deploying scalable applications using modern cloud infrastructure.

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript
- **Frameworks:** Django, Django REST Framework (DRF), Scikit-Learn, TensorFlow
- **Cloud & Deployment:** AWS (EC2, S3), Heroku, Gunicorn, WhiteNoise
- **Tools:** Git, Docker, PostgreSQL, RESTful APIs, Swagger

EXPERIENCE

Software Engineer | DataTech Solutions

Jan 2024 – Present

- Architected and deployed scalable backend services utilizing Python and the Django MVT architecture.
- Developed highly secure RESTful APIs using Django REST Framework for web and mobile clients, implementing JWT authentication and role-based access control.
- Trained and integrated machine learning models into production environments, reducing data processing latency by 20%.
- Configured AWS EC2 instances and managed application deployments via Heroku.

EDUCATION

B.S. in Computer Science | University of California, Berkeley | 2023
