PROFESSIONAL SUMMARY

Efficient DevOps Engineer focused on automating software delivery pipelines and building resilient infrastructure. Strong advocate for infrastructure-as-code (IaC) and continuous integration/continuous deployment (CI/CD) methodologies.

TECHNICAL SKILLS

- **Containerization:** Docker, Kubernetes (K8s)
- **CI/CD:** Jenkins, GitHub Actions, GitLab CI
- **Infrastructure as Code:** Terraform, Ansible, CloudFormation
- **Monitoring/Logging:** Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana)
- **OS:** Linux (Ubuntu, CentOS), Bash Scripting

EXPERIENCE

Site Reliability Engineer | *Streamline Systems*

Feb 2021 – Present

- Managed Kubernetes clusters across AWS and GCP, ensuring 99.99% uptime for high-traffic microservices.
- Built fully automated CI/CD pipelines using GitHub Actions, enabling development teams to deploy code multiple times a day.
- Set up comprehensive monitoring and alerting systems using Prometheus and Grafana to detect anomalies before they impact end-users.

EDUCATION

B.S. in Information Technology | Colorado State University | 2020

Certifications: Certified Kubernetes Administrator (CKA)
