Professional Summary

Aspiring Machine Learning Engineer with hands-on experience in Python, SQL, Statistics, Information Retrieval, and Machine Learning fundamentals. Experienced in building end-to-end projects including Retrieval-Augmented Generation (RAG) systems, SQL analytics solutions, statistical analysis projects, and machine learning algorithms from scratch using NumPy.

Education

Brototype – Machine Learning Specialization

Technical Skills

Programming: Python, SQL
Databases: PostgreSQL, pgAdmin, DBeaver
Machine Learning & Data Science: NumPy, Pandas, Matplotlib, Statistics, Hypothesis Testing, PCA
AI & Information Retrieval: Embeddings, Vector Search, BM25 Retrieval, RAG
Backend Development: FastAPI, REST APIs
Tools: Git, GitHub, Jupyter Notebook, VS Code

Projects

Resume Screening RAG System

Developed a Retrieval-Augmented Generation system with document chunking, embeddings, vector search, BM25 retrieval, reranking, and FastAPI endpoints.

E-Commerce SQL Analytics System

Built SQL analytics workflows using PostgreSQL for sales, customer, and product analysis.

Statistical Analysis Project

Performed EDA, hypothesis testing, correlation analysis, and visualization on real-world datasets.

PCA From Scratch

Implemented Principal Component Analysis using NumPy without machine learning libraries.

Gradient Descent From Scratch

Implemented gradient descent optimization and visualized convergence behavior.
